

Standardization of Training for Training Administrators

Focus and Goals

- The focus of this research was to find recommendations to improve and standardize training for Training Administrators at Air Traffic Control facilities, as well as at the Academy
- The goal was to provide recommendations on how to standardize training and give recommendations to improve the Training Administrator class at the Academy

Research Approach

- Training Administrators at Jacksonville ARTCC, Atlanta ARTCC, Central Florida TRACON, Daytona Beach TRACON and Dallas-Fort Worth TRACON were interviewed for their opinions and recommendations on how to improve and standardize training for Training Administrators
- The course monitor at Mike Monroney Aeronautical Center was interviewed for his opinion and recommendations on how to improve the course at the Academy

Value and Impact

- This project will improve the efficiency and effectiveness of Training Administrators by standardizing their training and better equipping them to do their jobs, leading to better performance
- Future research will include development of training materials at the Academy, training materials at facilities, and a revision to course 50310
