CURRICULUM ARCHITECTURE

Modular Curriculum Design

the WHAT

This project focuses on recommending a curriculum architecture design that supports the development and deployment of modular curriculum design that maps directly to the ATO job-task management system.

the GOALS

- Map existing training delivery system encompassing processes from job-task identification through training delivery and feedback
- Map new processes to address any gaps identified through mapping the process
- Develop a curriculum architecture design that will facilitate modular curriculum development

the WHY

The project will create a concept for curriculum architecture design that will demonstrate the feasibility of deploying modular and reusable curriculum in a variety of learning modalities.

the HOW

- Conduct Literature Review Collect FAA-ATO Artifacts (time to complete: 4-6 months)
- Map Current Process
- Validate Understanding
- Map New Process
- Develop concept for enhanced curriculum architecture
- Deliver recommendations
